Activate
Immune Complex®

A Powerful Boost for Your Immune System

Are your defenses down? 
Activate can help. With a unique combination of echinacea and two other powerful extracts shown effective in studies, Activate boosts your body’s natural defenses, increases your resistance, and helps you stay well.*

Advanced Formula
• A proprietary mixture of echinacea, astragalus, arabinogalactan, vitamin C, vitamin E, folic acid, selenium, and zinc.

Clinically Tested
• Scientific studies show that the ingredients in Activate work effectively to boost your immune system and help you stay well.*

For the Whole Family
• Works naturally with the body’s own systems; delivers standardized extracts for consistent potency; great for the whole family.

Though all vitamins and minerals are necessary to maintain a strong immune system, vitamins C and E, folic acid, selenium, and zinc have been found to be crucial to the development and response of white blood cells.*

*A: These statements have not been evaluated by the Food & Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.
The world grows smaller every day. Airplanes, movie theaters, shopping malls... many of the places we visit on a regular basis are cozy harbors for germs. As the chance of contracting dangerous microbes becomes more and more likely, what can we do to protect our health?

**Maintaining Your Defenses**

*Activate Immune Complex* is an exclusive combination of extracts and vitamins that have all been shown, in scientific studies, to help support the body’s own defense mechanism, the immune system.*

Made up of many different types of white blood cells, the immune system is like an army poised and ready to attack any enemy brave enough to cross the body’s protective barriers. There are many different types of these white blood cells, including macrophages and granulocytes, both of which defeat opposing forces by engulfing them like snakes swallowing eggs. T cells help keep the forces in balance while B cells produce antibodies.

Antibodies work together to destroy the enemy, then forever remember his face in case he should return to cause trouble again.

**Supported by Reliable Research**

Unlike many similar products, *Activate Immune Complex* is not simply one extract in a bottle. Rather, it is a combination of key nutrients designed to help the body defend itself. These ingredients combine to give the body the tools it needs to maintain a strong immune system.*

**Don’t Miss Out!**

Don’t miss the things that matter to you. In a world where our defenses are constantly being stressed, *Activate Immune Complex* can help support, rejuvenate, and refresh the immune system... so you can stay well, stay active, and be there for the important things in your life.*
