

tips and tricks: What Skin Care Regimen Should I Use?

Want to get the absolute most out of your skin care? Use the complete regimen. *Sei Bella* products are specifically designed to work together, each step delivering an increased amount of peptides, botanicals, and nourishing extracts to the skin. Using a complete regimen allows you to maximize your results by combining basic skin care with specialized treatments—giving you better results than you would get from using the products separately.

protect

Skin is smooth, soft, and fresh, yet you may start to see early signs of dryness and fine lines. This is the time to protect your skin from damage as well as prevent early aging.

correct

Signs of aging are more apparent. Skin has increased dryness, age spot formation, and loss of firmness. Fine lines and wrinkles begin to form. Pores begin to enlarge. This is the time to treat and correct early signs of aging.

revitalize

Dry skin, enlarged pores, and age spots are common. Skin has lost significant density and firmness. Sagging and loss of contour are prevalent, particularly in the jaw area. This is the time to restore health to your skin through more intensive treatments.
